Professional Summary

Full-stack developer from Astana crafting clean, fast and memorable digital products. I work across frontend, backend and data — from React and TypeScript interfaces to Node.js and Python services on PostgreSQL — turning product requirements into reliable applications with clear structure and thoughtful details. At TNK Solutions I build ValuAI, an AI platform for property appraisers, and develop the frontend of an access control system for KazakTelecom as part of a team. In parallel I build my own product, AIRec. I am most interested in AI-powered products and in turning complex processes into simple, convenient tools.

Professional Experience

TNK Solutions, *Full-stack Developer* 07/2026 — Present
Astana, Kazakhstan

- Developing ValuAI, an AI-powered platform for real estate appraisers: valuation reports, contracts and document processing across interface, backend services and data workflows.
- Frontend Developer on the SKUD project — an access control system built for KazakTelecom.
- Working in a development team with a shared codebase and a merge-request Git workflow.

Freelance, *Full-stack Developer* 2025 — 2026
Remote

- Delivered 20+ web projects for clients, from requirements and UI implementation to backend integration and deployment.
- Built responsive frontend interfaces and backend services tailored to client needs.

Projects

AIRec, *AI receptionist for business* 2026 — Present

Own product for salons and barbershops: an AI assistant replies to clients in Telegram using the business's real prices and hours, creates booking requests and keeps chats, calendar and notes in one dashboard.

React, Vite, Tailwind CSS, Python, FastAPI, PostgreSQL, Gemini API, Telegram Bot API

ValuAI, *AI platform for property valuation* TNK Solutions · 2026 — Present

Valuation reports and contracts with PDF/DOCX/Excel export, comparable-listing search, team chats and an AI agent that fills reports from client documents.

React, TypeScript, Node.js, Express, Prisma, PostgreSQL, Claude API, MCP

SKUD, *access control system for KazakTelecom* TNK Solutions · 2026 — Present

Pass office web app: requests, personnel, checkpoints, transport and visitor records. I build the frontend in a team.

React, TypeScript, Vite, TanStack Query, Zustand

Skills

Frontend
React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend
Node.js, Express, Python, FastAPI, REST API

Databases
PostgreSQL, MongoDB, Prisma, structured data design

DevOps & Version Control
Docker, Git, GitHub, GitLab

API & Workflow Tools
Postman, Vite, Figma

Product Focus
Responsive interfaces, reliable services, AI-powered products

Education

AI Engineering, *Kazakh University of Technology and Business (KazUTB)* 2026 — Present

Software Engineering, *Astana IT University College* 09/2023 — 05/2026
